

KOSHKENBEK DAUREN

Cybersecurity Specialist · SOC Analyst L1 · Penetration Tester (in training)

Astana, Kazakhstan | daurencd@gmail.com | Telegram: @yellowcd

daurencd.xyz | github.com/daurencd01 | linkedin.com/in/dauren-koshkenbek-6b90a9358

PROFESSIONAL SUMMARY

Cybersecurity graduate of Astana IT University (2026) and SOC Analyst L1 with hands-on experience in security event monitoring, log analysis and incident triage in national and international SOC environments. Blue Team practitioner who is building offensive security skills (penetration testing with Kali Linux) and develops his own security tools and web products. Target role: SOC Analyst L2 / Blue Team Engineer; long-term goal: Penetration Tester with a strong defensive background.

PROFESSIONAL EXPERIENCE

SOC Analyst L1 — Sauyt Lab (Freedom), Kazakhstan

Feb 2026 – Present

- Monitor security events in a SOC supporting national-level information security operations.
- Analyze logs from network, endpoint and system sources; perform initial alert triage and incident investigation.
- Identify suspicious activity and escalate incidents in a high-responsibility environment.

SOC Analyst L1 — Sr Holding, China

Sep 2025 – Feb 2026

- Monitored security events in an international SOC environment.
- Analyzed network, endpoint and system logs; triaged alerts and investigated incidents, escalating when required.
- Worked daily with security monitoring tools and dashboards.

Network Security Project Participant — Kazakhtelecom (Sapa+), Kazakhstan

Jan 2025 – Jun 2025

- Took part in a network security project and supported secure network infrastructure in a large telecom environment.
- Monitored and performed basic analysis of network security events.

PROJECTS

- **HackShield** (graduation project): gamified cybersecurity training platform with interactive missions, challenges and a 2D game. React, TypeScript, Supabase.
- **OYNA**: Kazakhstan's first platform for amateur sports with skill-based matchmaking for players and verified organizers. Next.js, TypeScript.
- **KD_SEC Security Tools** (daurencd.xyz): web security scanner (TLS, HTTP headers, cookies, CORS, exposed files), OSINT lookup (WHOIS/RDAP, DNS, certificate transparency, Wayback) and exposure check (k-anonymity password lookup). Passive checks only; JavaScript, serverless functions.

EDUCATION

Astana IT University, Astana, Kazakhstan

Graduated 2026

Bachelor's Degree in Cybersecurity (6B06106); diploma No. BD 00040351726, awarded 30 June 2026

CERTIFICATIONS

- CyberShield Certified SOC Analyst (CSCSA) — CyberShield Academy, State Technical Service
- Red Hat System Administration I (RH124) — Red Hat Training and Certification
- Securing Cloud and Hybrid Networks — LearnQuest
- Next-Generation Firewalls and Intrusion Prevention — LearnQuest
- Exploratory Data Analysis for Machine Learning; Supervised Machine Learning: Regression — IBM

SKILLS & LANGUAGES

Defensive	SOC monitoring, SIEM concepts (Splunk), log analysis, alert triage, incident response, Wireshark
Offensive	Kali Linux, Nmap, Burp Suite, Metasploit, SQLMap; reconnaissance, enumeration, web application testing (training level)
Development	Python, JavaScript, TypeScript, React, Next.js, Git, Docker; Linux and Windows administration basics
Languages	Kazakh (native), Russian (C1), English (B1), Chinese (HSK 5)
